

Africanized Honey Bees

**Bee Aware...
Look, Listen, Run**

Africanized Honey Bees are established in Florida

What is being done to control Africanized honey bees?

- State monitors over 500 bait hive traps
- Traps are checked monthly
- Please do not disturb traps
- If you see bee activity around the traps, you can help by calling **888-397-1517**

Bee Aware... Look, Listen, Run

- Always remain alert for bees or other stinging insects
- **Look** and **Listen** for bees in work areas before using power equipment – noise excites bees
- Be aware of potential nesting sites such as old tires, holes in walls, hollowed out tree trunks, wood piles and equipment
- If attacked, **Run** quickly and get inside a building or vehicle
- Don't swat at bees
- Cover your nose and mouth
- Contact a licensed pest control operator to remove feral nests
- Seek medical attention, if needed
