## CHECKLIST OF BIRDS

Snowy Egret

Florida Department of Agriculture and Consumer Services  
Adam H. Putnam, Commissioner

Florida Forest Service  
James R. Karels, Director  
www.FloridaForestService.com

Little Big Econ State Forest offers birders a unique opportunity to observe numerous species of birds from two distinct habitats. The Demetree Tract, located south of CR 426 on Snowhill Road, provides a parking area surrounded by a longleaf pine restoration project. This area is frequented by meadowlarks, bluebirds, sparrows and raptors. Follow the trail southwest to the Econolockhatchee River for excellent birding diversity of resident and migratory songbirds such as summer tanagers, blue grosbeaks, vireos and black-throated blue warblers.

The Kilbee Tract is located on SR 46, 4.3 miles east of CR 426. After parking and hiking one mile, you'll arrive at the St. John's River which offers an expansive view of waders, shorebirds and ducks, especially in fall and winter.

### SEASONS

These categories indicate the general periods in which to expect the various species.

Spring	(Sp)	March,	April,	May
Summer	(Su)	June,	July,	August
Fall	(F)	September,	October,	November
Winter	(W)	December,	January,	February

### CATEGORIES OF ABUNDANCE

These designations apply to the relative abundance of species seen (or heard) in the appropriate habitat.

C - common: usually present in large numbers likely to be seen

U - uncommon: usually present in small numbers, not certain to be seen or heard

Forster's Tern
